

# \$25 for \$1

How's that for a financial return?

Norfolk Southern's Crescent Corridor public-private partnership to increase freight capacity on the 2,500-mile railroad route from Pennsylvania to the Southeast will generate \$25 in public benefits for every \$1 invested, experts say.

That's a great return for America. 73,000 jobs and substantial highway congestion savings, reduced CO2 emissions, and fuel savings don't hurt either. Visit [www.TheFutureNeedsUs.com](http://www.TheFutureNeedsUs.com) to find out more. And yes, there's definitely more.
